### 1 Notes

# 1.1 Model description ETS(U,V,W)

- The first letter U denotes the error type : A (Additive), M (Multiplicative)
- The second letter V denotes the trend type : N (None), A (Additive), Ad (Additive damped), M (Multiplicative), Md (Multiplicative damped)
- The third letter W denotes the season type: N (None), A (Additive), M (Multiplicative)

# 1.2 Model description ARIMA(p,d,q)(P,D,Q)m

- p is the AR order
- d is the degree of differencing
- q is the MA order
- P is the seasonal AR order
- D is the seasonal degree of differencing
- Q is the seasonal MA order
- m is the seasonal frequency

### 1.3 Model description HoltWinters

- alpha is the parameter of Holt-Winters Filter
- beta is the parameter of Holt-Winters Filter
- gamma is a parameter used for the seasonal component
- seasonal : ADDitive or MULtiplicative

# 2 Results for automatic ets and ARIMA
